

Reef Guardians is presenting:

in partnership with Wastewater Alternatives and Innovations
www.reefguardians.org (808) 651-0286

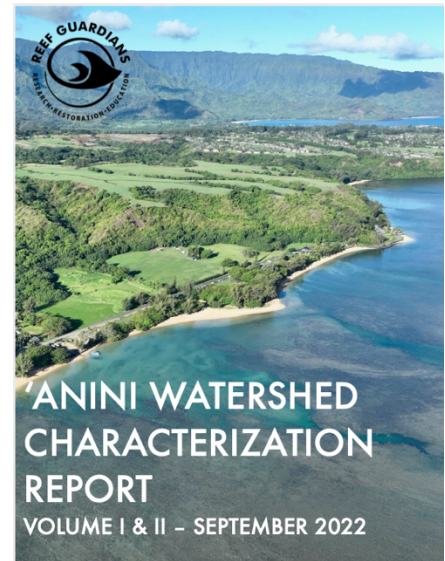

Live event! Learn more about our precious
& endangered Wanini ('Anini) Watershed
— New Water Testing Program Explained

Sunday February 4, 2024

from 2:00 – 3:30 pm

The Cliffs at Princeville

*"Protect the ocean and you protect
yourself" – Jean-Michel Cousteau*

REGISTER FOR THE PRESENTATION and/or Feb. 3 WATER TESTING TRAINING here or at reefguardians.org

Attached is the link for you to download the [ANINI WATERSHED REPORT](#). This very informative and visual report will help you to be prepared to ask any questions. The report is concerned with mauka to makai (mountain to ocean) impacts on the lagoon from Kalihiwai to Hanalei.

Reef Guardians Hawaii is a nonprofit environmental conservation organization based in Princeville with the mission to preserve Hawai'i's reefs through Research, Restoration and Education. Reef Guardians was formed to address the decline of the coral reef ecosystems on Kaua'i and across Hawai'i and to work to restore their health for the benefit of the natural environment and the people who reside and visit.

Featured speaker: Christina Comfort. Our Wanini ('Anini) Watershed Hui's Water Quality Scientist and citizen scientist Water Testing Trainer

Christina Comfort is a PhD candidate holding an [M.Sc.](#) in Biological Oceanography from the University of Hawai'i. She worked for 8 years as a coastal oceanographer at the Center for Physical Oceanography and Marine Ecology. Her research centers on the health and conservation of Pacific Island coastal marine ecosystems. She's managed many research projects involving long-term water quality and oceanography measurements in the context of human impacts on coastal systems.
